Window Function

#Syntax

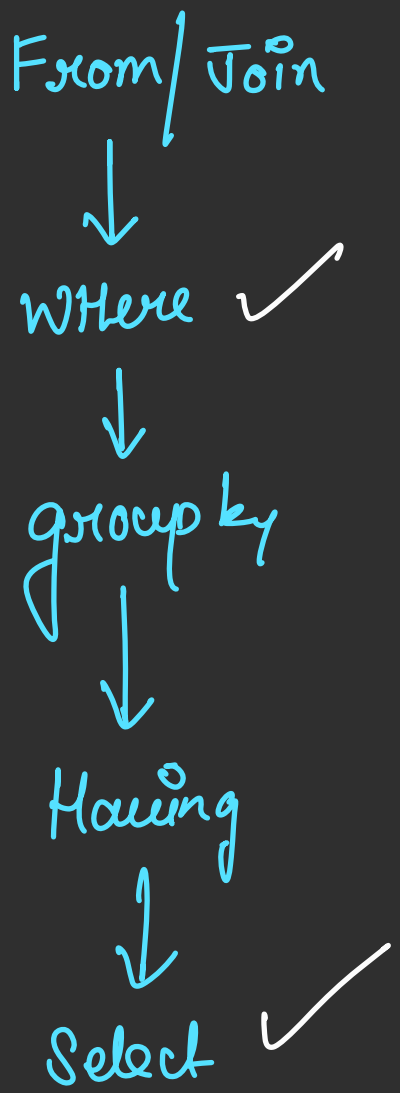

```
Select

    Agg Fun ( col_name )  OVER ( partition by col_name
                                 order by col_name )
    min/max/sum

                                 as alias_name

FROM

Table
```

From/Join
Where
group by
Having
Select

price	Rank
1000	1
1000	1
1000	1
500	4
200	5
200	5
200	5
100	8

Q) Find the 2nd Highest Salary of employes ?

10th

(Sub query)

Concept of rank ⟶ dense rank

Head

dept

20 employees

(salary)

Cum Sum

Running Total

100, 200, 300, 400

RT / CS ⇒ 100, 300, 600, 1000
