New Feature – Define metrics

PM reaches out to you after launch of a new save feature on Facebook to assess the success of this feature. Define the metrics you would like to measure.

1. Clarify
2. Business Goals
3. Define metrics
4. Summarize

Made with Goodnotes

clarify :

- What does this feature apply to ?

  Are we talk about post / Images / Link / pages / Groups / Events

- How many posts can be saved ?

- Is there any exipery for saved feature ?

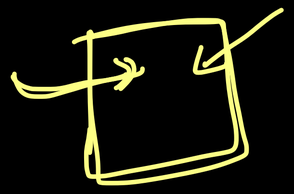

- Is this is going to remind me or not ?

- who is going to get benefit from this feature ?

  - user, marketers, fb-team, Content Creator

Made with Goodnotes

Business Goals

- User Goal

- They do not need to copy paste or take a Screenshot of the post they want to checkout later. To revisit

Tax

- Marketer Goal : Increase revenue for marketers by increasing clicks and impressions

- FB-Team . engagement, Retention

Define Metrics

1. Awareness → FB

✓ Are the users aware of this feature or not ?

Save post

⇒ ✓ % of users who saved atleast one post ?

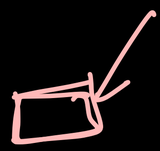

↓

= # of users who saved atleast one post / total # of users

→ pre-read **

Feb 2024 Batch

=> # of users who clicked on pre read / # of users in the batch

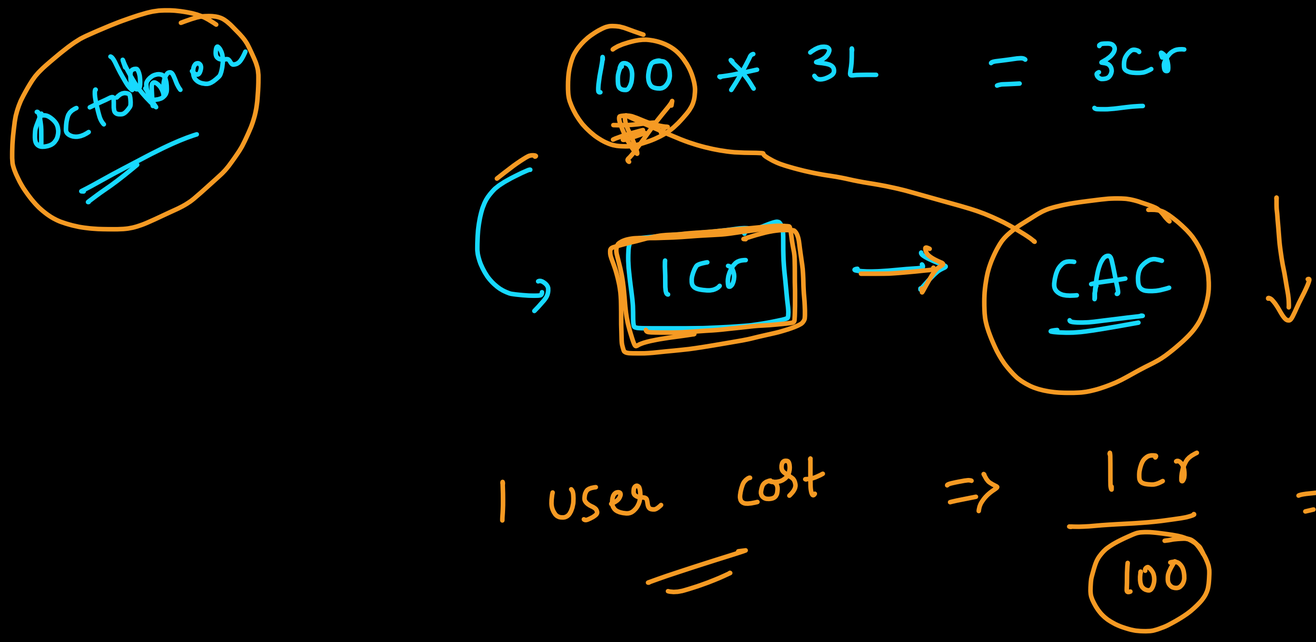

(2) % of Users returns to saved ~~post~~ content

- organically
- Reminders

Acquisition :

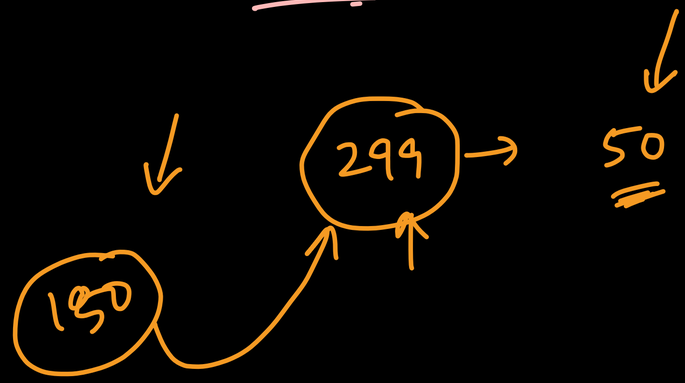

↳ How much money we are spending to acquire user

Scaler : yoga ad

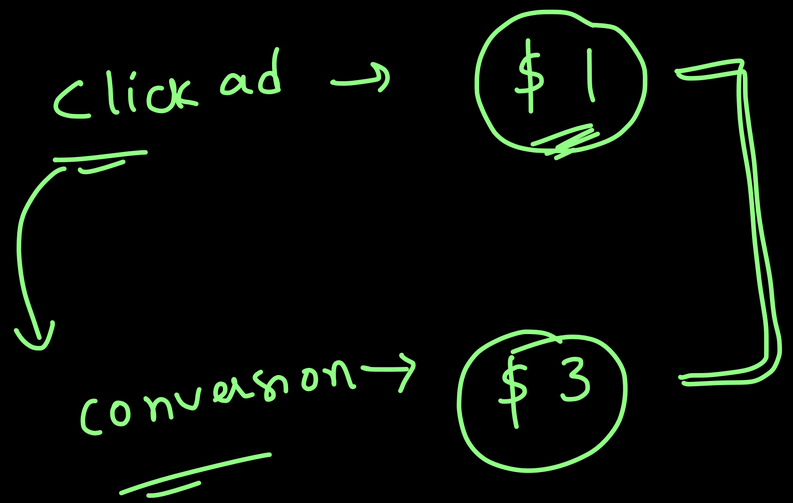

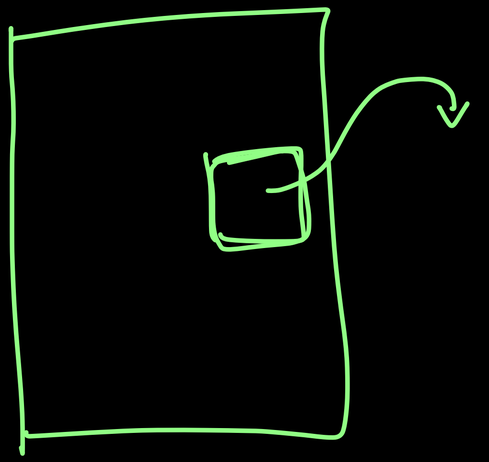

1 user cost => 1cr / 100 = 1lakh ✓
