Agenda

* Root Cause Analysis

- Myntra Case study

Assignments

1st → theoritical

2nd → Coding

Made with Goodnotes

Different kinds of product sense problems

* Product Diagnostics – Analyse The metric change

* New product / Feature – Measuring performance / Succes

* Product Design – Launch feature Recommendation

* Product Improvement

Made with Goodnotes

Analyse the metric change

- C - clarify ✓
- R - Ruleout ✓
- I - Internal Data ✓
  - T - Time ✓
  - R - Region ✓
  - O - Other related feature ✓
  - Pi - platform ✓
  - C - Canibalization ✓
  - S - Segmentation ✓
- E - External Data ✓
- D

Made with Goodnotes

Measure Performance / Success

1. Clarify — What, How, why & who?
2. Business Goals — Customer / user personal goals
3. *** Define the metrics — Awareness, Acquisition, Adoption, Engagement, Revenue & profit, Retention / Renual, Gaurd rail metric
4. Summarize — North Star metric, Level 1 metrics, Level 2 metrics

What is Root cause Analysis ?

↳ Systematic process of identifying the underlying causes of a problem or issue

Motive : Fix the bug long term

Examples:

(1) App has crashed [why ?]

(2) DAU suddenly decreased by 20% [ ]

↓

Daily active users

Made with Goodnotes

(3) Amazon / Flipkart → abandon the cart

swiggy / zomato →

⇒ Goal of Root cause Analysis :

1. Find the root cause :
2. Understand or design a fix :
3. Apply learning to prevent future issue

Made with Goodnotes

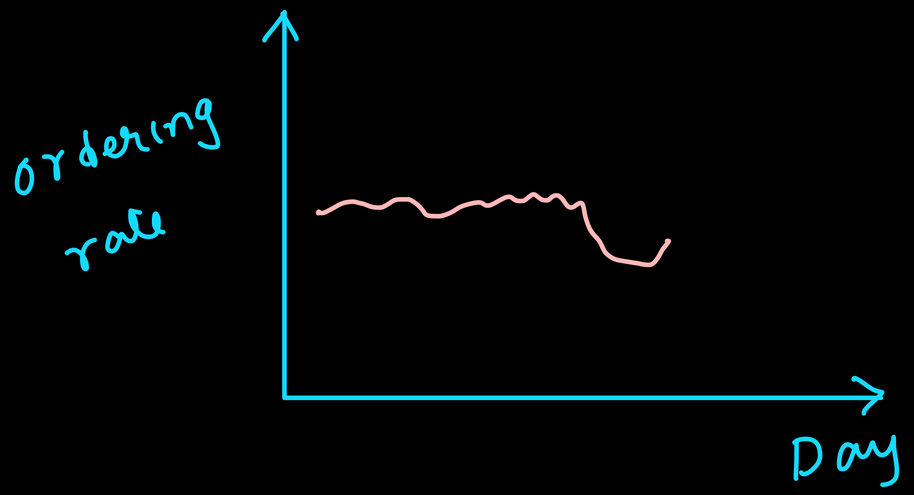

(1) CRIED

(2) 5 why's ?

Myntra : Problem statement

Myntra has observed a decline from 5% to 3% (i.e., 2%) in the number of confirmed orders over the last 3 days. You have to perform a Root Cause Analysis and help us diagnose the issue.

ordering rate

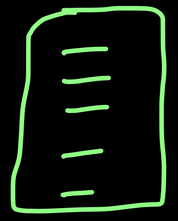

Made with Goodnotes

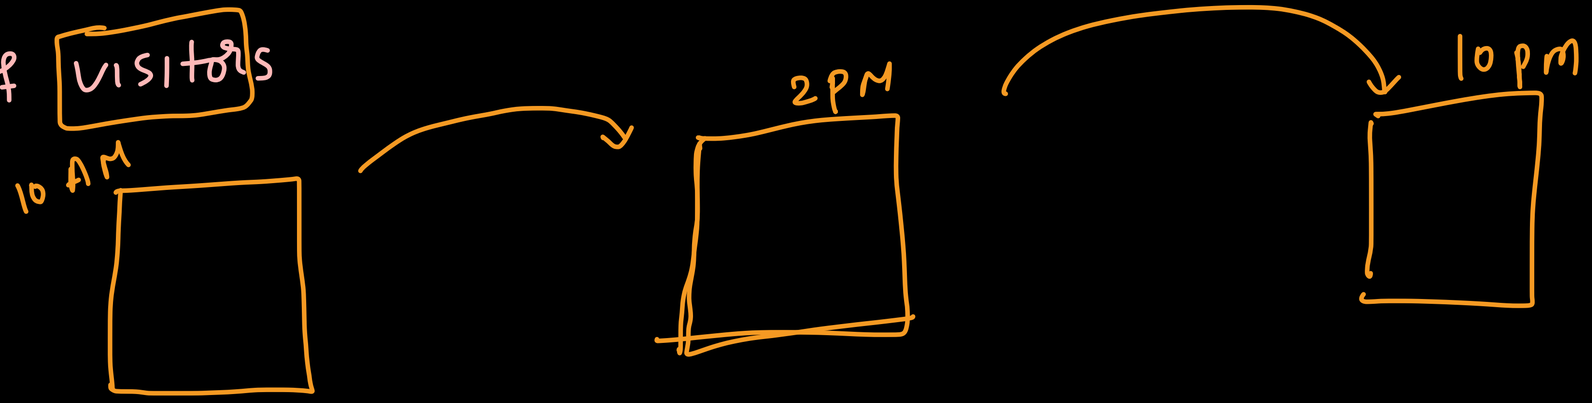

⇒ ✓✓ ordering rate = $\frac{\#\text{ of orders}}{\#\text{ of visitors}}$

⇒ # of orders.

1 order →

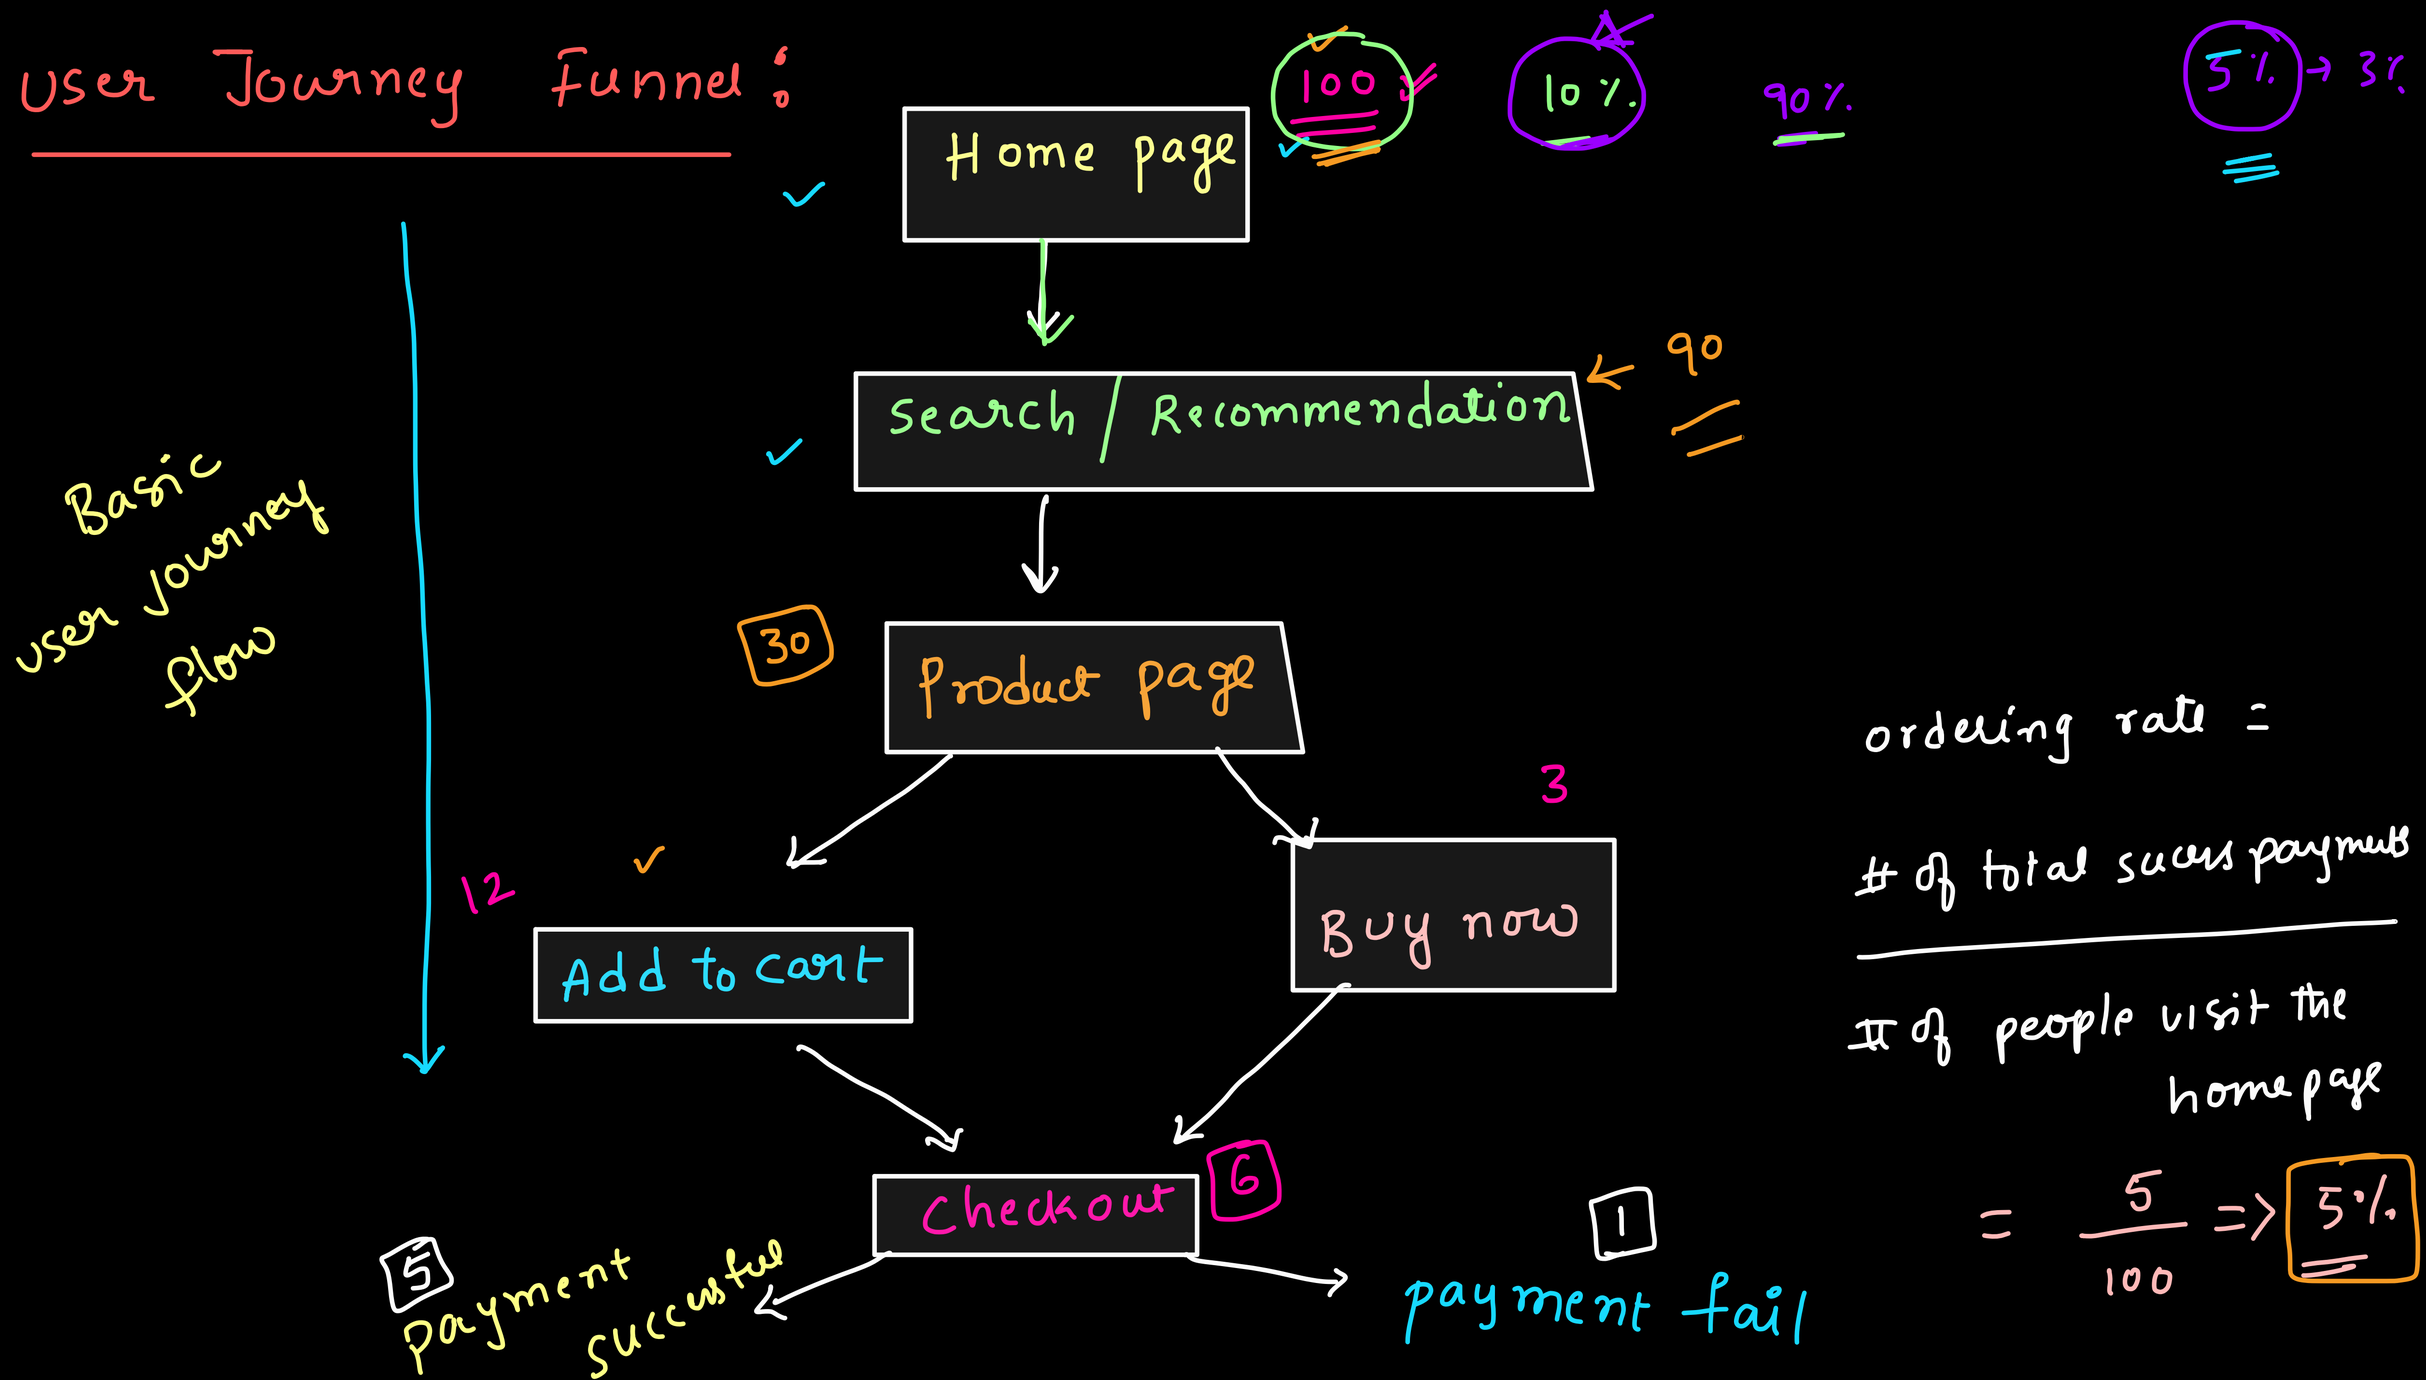

⇒ # of visitors

Made with Goodnotes

User Journey Funnel:

ordering rate =

$$\frac{\#\text{ of total success payments}}{\#\text{ of people visit the homepage}}$$

$$= \frac{5}{100} \Rightarrow 5\%$$

Click Stream Data

Cookies
- Session cookies
- login cookies

⇒ Click stream data is the inf collected about the user while they browse through website (or) web browser

Bounce Rate :

Back track user Journey Flow:

$$= \frac{\#\ of\ orders}{\#\ of\ visits}$$

1. Is the drop no of visitors happend on any specific date ?
   a. is the drop in total visit in a day ?
2. Bounce rate increase
3.
4. users might not able to add item to the cart page
