Product Metrics - 2

Cases:
- Fitness App
- Bank

= Class starts @ 9:03 PM =

Recap: FB - save for later feature

1. clarity → what, How, Why & who
2. Business Goals → Customer/user personas & goals
3. Define metrics → THINK OF A CUSTOMER JOURNEY ↓
   Awareness; Acquisition; Adoption;
   Engagement; Revenue & Profits;
   Retention/Renewal; Guardrails
4. Summarize → NSM, L1 & L2 metrics

Case1:

Fitness

Purefit → app → free → some videos; info ; cant be customized

app → paid → personalized diet meals; (1)

expert advice (2)

all videos → exercise (3)

(sm)

Biz. context

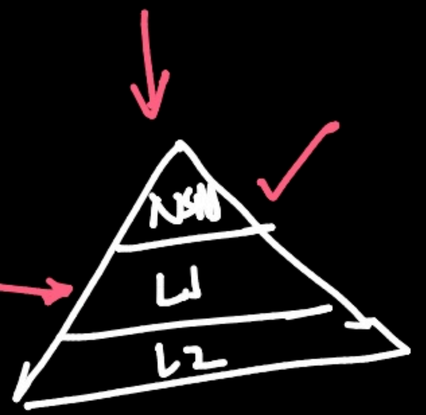

Goal

NSM: 'consistent' usage for atleast 2 months..

1. Clarify → what, How, why, who → .... TG: Target Group
   Rizefit

2. Biz-goals → Customer personas & goals
   - app-users → become fit/healthy ...
   - expert coaches → revenue; help others

3. *** Define metrics → CUSTOMER-JOURNEY
   Acquisition

4. Summarize → NSM, L1 & L2

NSM:

MAU

MAY
100K

APY
150K

used the app
atleast 3 times a week & atleast 3 weeks a month

50K → ...

Code
(Python/SQL)

→ MAY NOT WORK FAULTY...

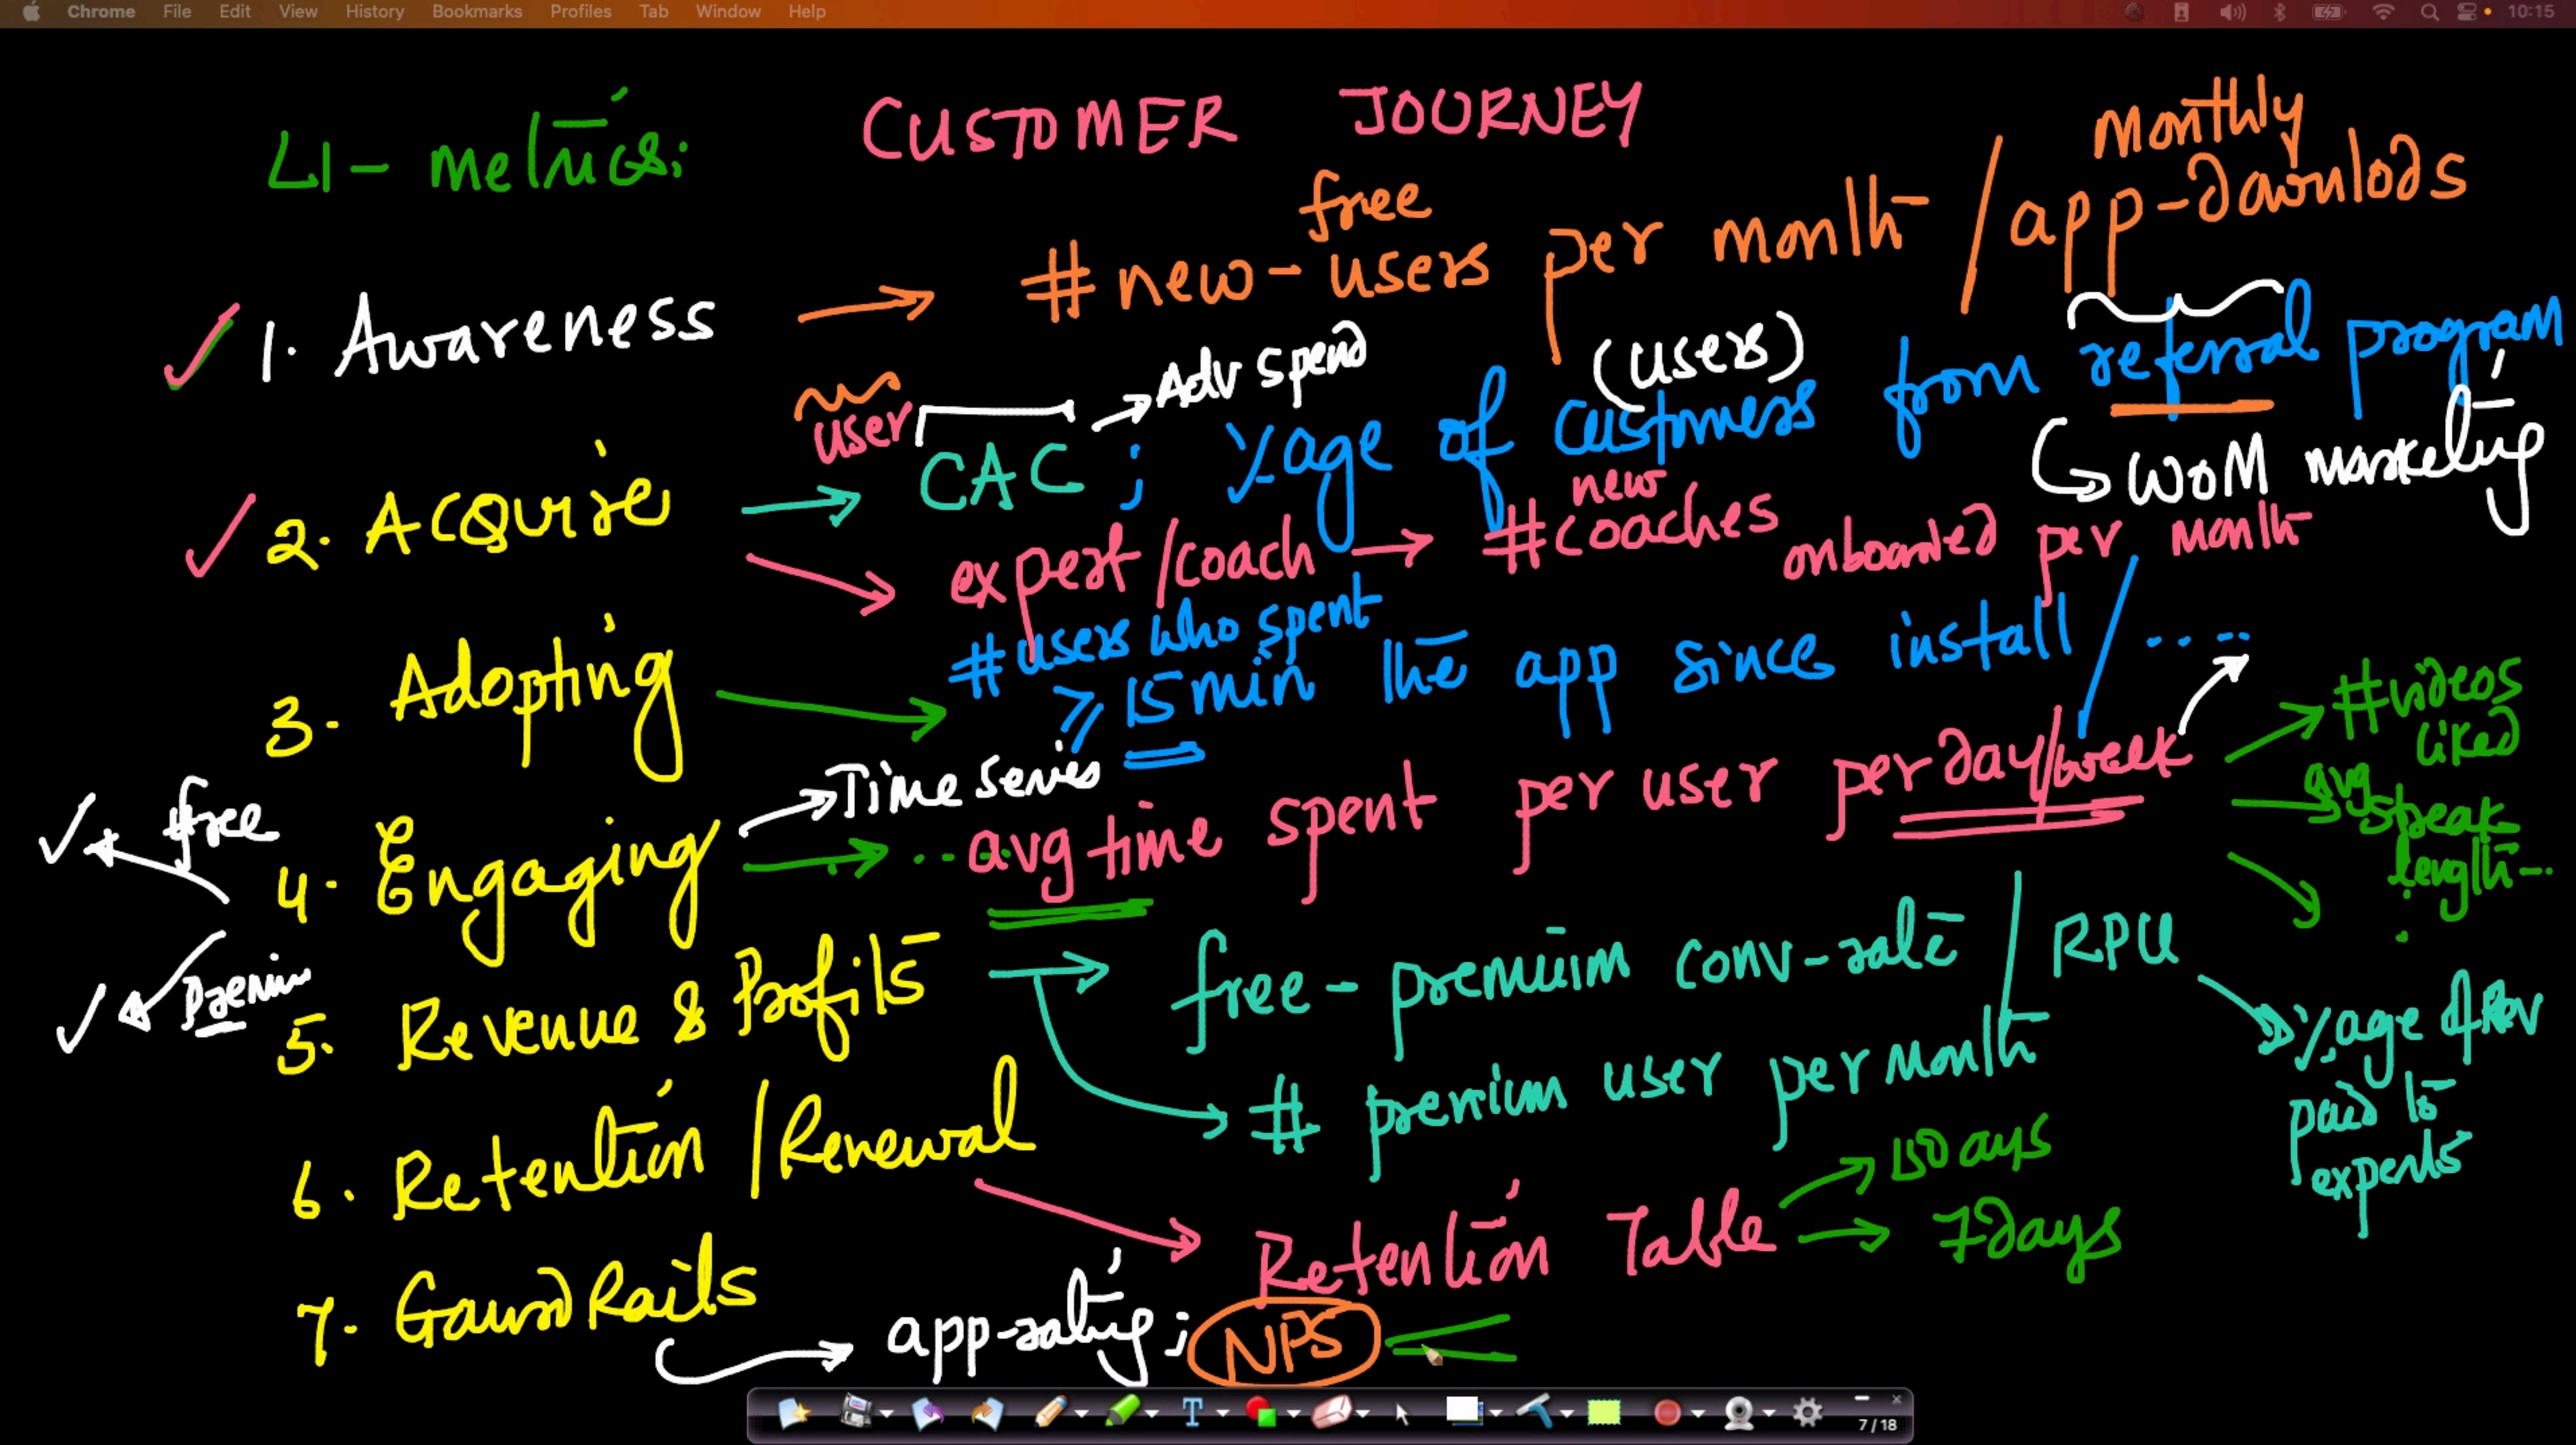

NSM:

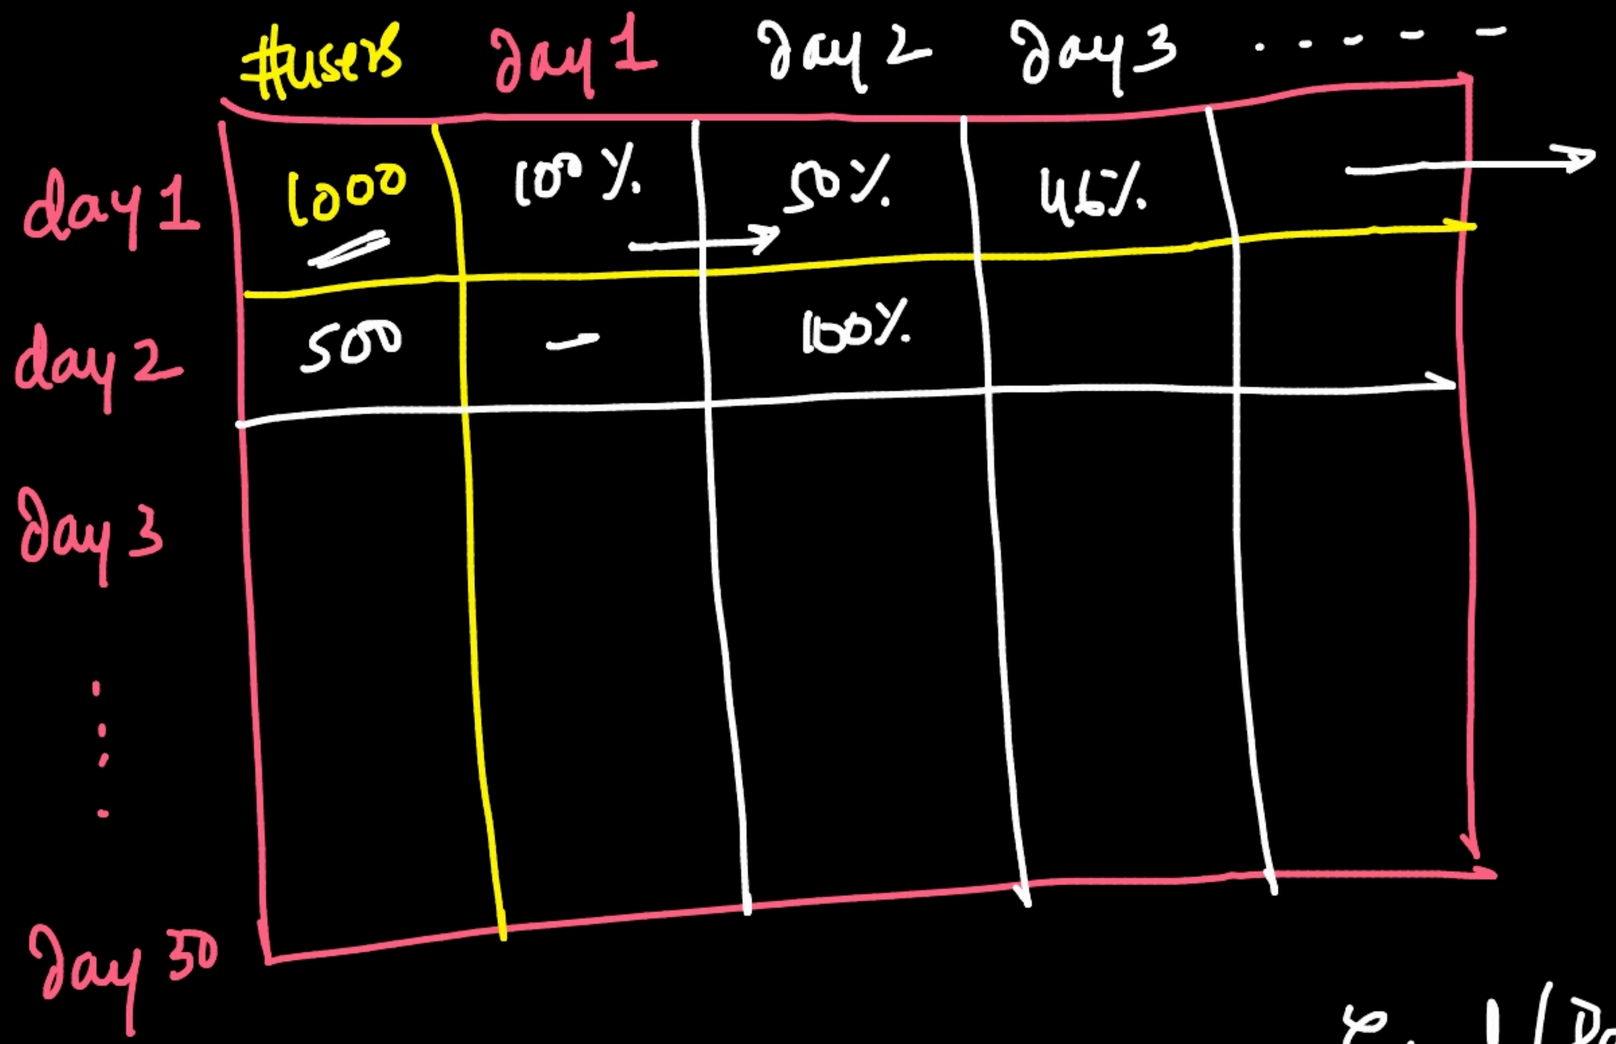

Active users who have used the app ≥ 2 consecutive months

- opened ≥ 3 days per week
- (AND) ≥ 3 weeks a month

alternatives ✓

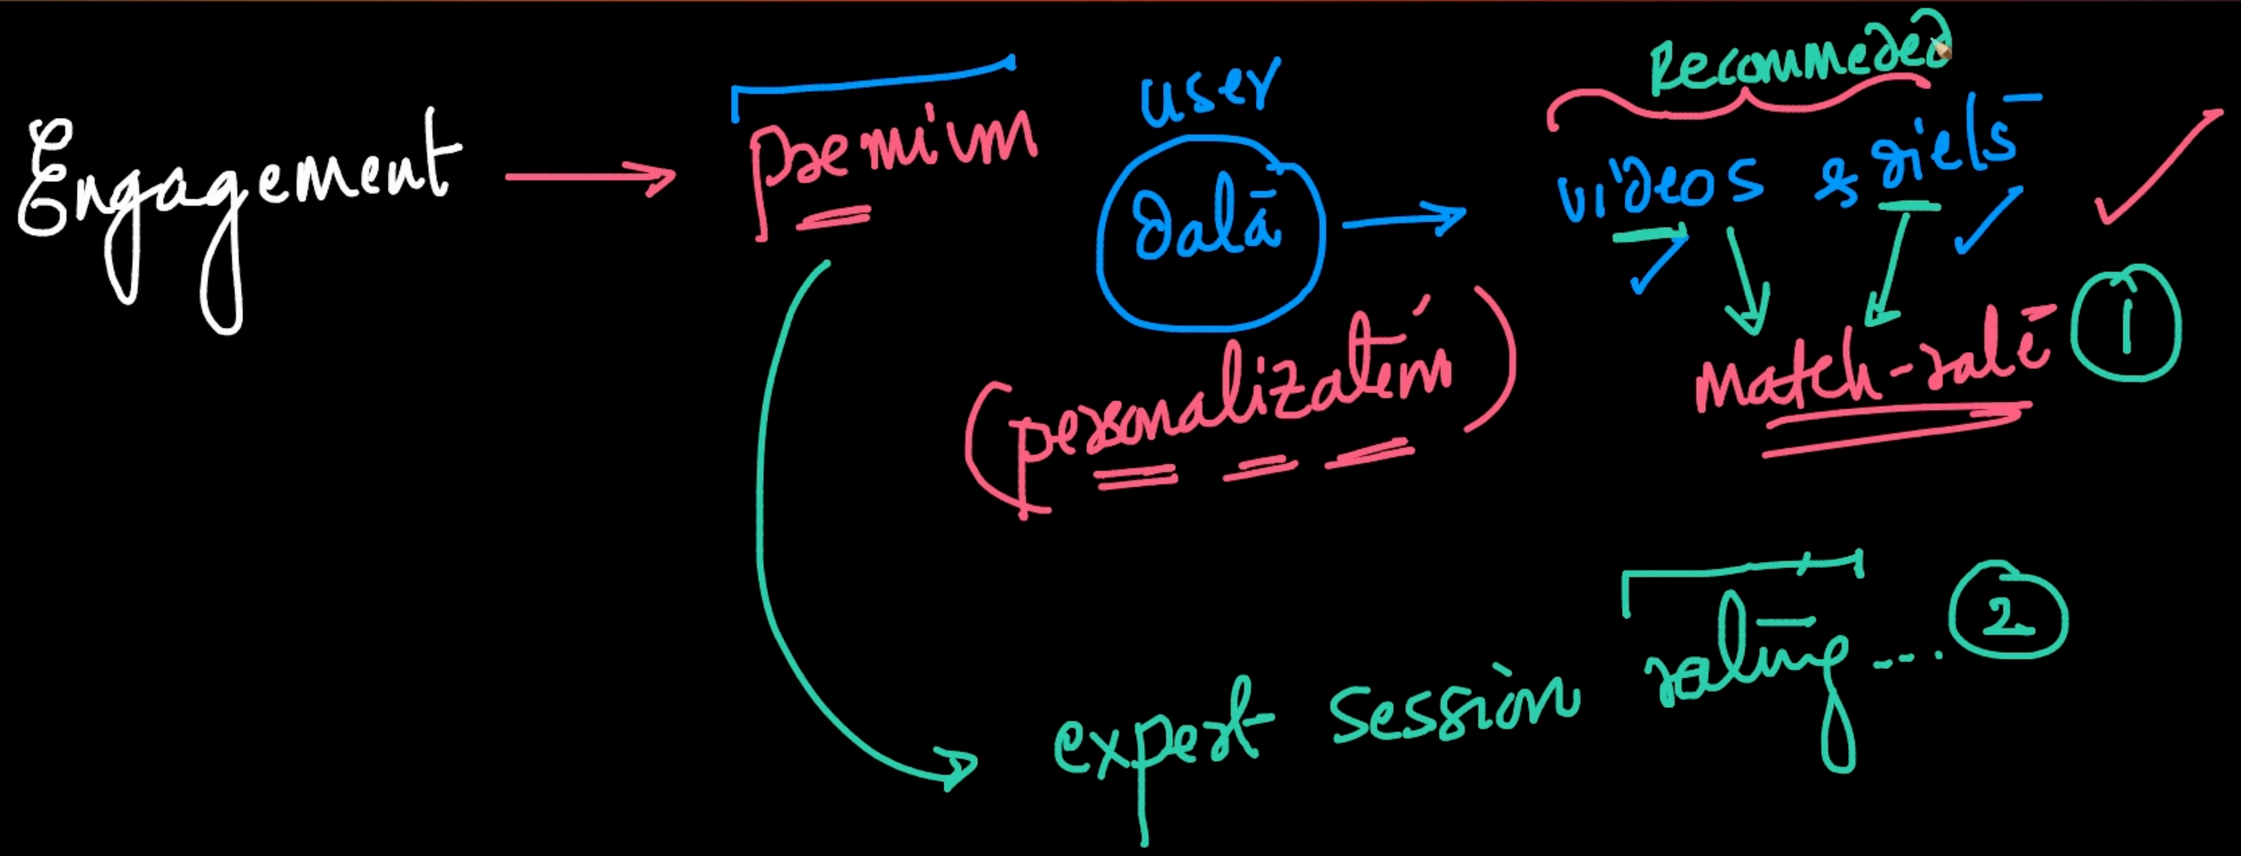

L1 - metrics:
CUSTOMER JOURNEY
1. Awareness
new-users (free) per month / app-downloads (monthly)
2. Acquire
CAC; User → Adv spend
% age of customers (users) from referral program
WoM marketing
expert/coach → # coaches (new) onboarded per month
3. Adopting
users who spent ≥ 15 min the app since install / ...
4. Engaging
Time series
.. avg time spent per user per day/week
videos liked
avg speak length ...
free
premium
5. Revenue & Profits
free - premium conv-sale / RPU
premium user per month
% age of rev paid to experts
6. Retention / Renewal
Retention Table → 150 days → 7 days
7. Gaurd Rails
app-rating; NPS

③ Define metrics + ④ Summarize

- NSM → MAU
  - ↳ opened the app atleast once a month
- ✓
- [Alt: Total amount of transactions through the app
  - #transactions

15 / 19

Chrome File Edit View History Bookmarks Profiles Tab Window Help 10:35

L1:

Awareness → % age of app users → MIF → Urban / Rural; <40yrs; 40+yrs...
→ # Downloads → iOS; Android

Acquisition → CAC (calls; TV; Youtube print; emails)
→ CAC on Youtube
→ CAC on phone calls
→ CAG
→ :

Adoption → # users who have made atleast one txn after install
→ Ur vs Rural -ban
→ ios vs And
→ <40yrs; 40+yrs;
✓ any feature ✓

Engagement → % age of Customers using BANK-UP!
- loans / EMI
- CC
- ⋮

→ > 5 txns per month

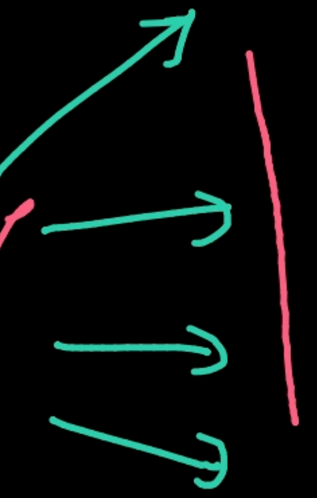

Task Completion Rate

Retention → ...

Churn - sale
↳ not opened the app even once in a Quarter

Revenue & Profit

↳ % age of monetary-value transacted using the app

Chrome File Edit View History Bookmarks Profiles Tab Window Help 10:55

Gauss Rails

- % age of failed txns
- TAT: Turn around time → < 1 lakh in 24 hrs
- % age of app crashes...

Growth Strategy

The One Number You Need to Grow

by Frederick F. Reichheld

From the Magazine (December 2003)

Summary. Companies spend lots of time and money on complex tools to assess customer satisfaction. But they're measuring the wrong thing. The best predictor of top-line growth can usually be captured in a single survey question: Would you recommend this company to a friend?

This finding is based on two years of research in which a variety of survey questions were tested by linking the responses with actual customer behavior—purchasing patterns and referrals—and ultimately with company growth. Surprisingly, the most effective question wasn't about customer satisfaction or even loyalty per se. In most of the industries studied, the percentage of customers enthusiastic enough about a company to refer it to a friend or colleague directly correlated with growth rates among competitors.

Willingness to talk up a company or product to friends, family, and colleagues is one of the best indicators of loyalty because of the customer's sacrifice in making the recommendation. When
